

WHO WE ARE... MADE IN THE U.S.A

Rosco was established in 1907 and is currently one of the largest suppliers of automotive vision safety products to the bus and truck marketplace. For over a century, our goals have remained the same: We are committed to producing the highest quality automotive products and providing the superior service our customers have grown to expect.

Today, while Rosco mirrors are on all school buses manufactured in North America, we also supply our mirrors, visors, and digital vision products to nearly every commercial bus, truck, military, and specialty vehicle manufacturer as well. Our products are designed and built in the USA and include mission critical driving safety aides such as interior and exterior mirrors, sun visors, back-up and side view cameras, video recording and sensor products. Our staff has grown to over 250 total employees in facilities totaling over 150,000 square feet. As we move forward, we have set our goals even higher to continue developing the most innovative products in the industry to meet the ever changing needs of the automotive marketplace.
