

DUAL-VISION 4 | CONTINUOUS & EVENT HD VIDEO RECORDER

THE ULTIMATE SAFETY SOLUTION FOR COMMERCIAL FLEETS

DUAL-VISION® XC4 & ROSCOLIVE®

Dual-Vision XC4 (DVXC4) & ROSCOLive bring the power of real-time fleet management to your fingertips. Rosco's Dual-Vision XC4 is an advanced HD mobile video camera that helps reduce risk, improve safety, and lower the costs of transportation and management of commercial fleets.

Designed and manufactured specifically for the fleet environment, Dual-Vision automatically and continuously records while the vehicle is in operation (and optionally while vehicle is off with parking mode enabled), and has its own internal high-capacity, scalable memory for retrieval of Event and non-Event "continuous video" for further analysis when required.

Built tough for the commercial fleet environment, Dual-Vision is the only windshield based recorder that is protected by two proprietary physical key locks and gear lock, which prevent access to SD card memory, angular adjustments/tampering, and power connections. Add the best temperature, shock, and vibration ratings in the industry, and you will appreciate that Dual-Vision is the most qualified recorder to protect your drivers, assets, and business.

"Dual-Vision XC4's instant driver feedback is the equivalent of a safety expert sitting side by side with drivers and training them on safe practices that result in behavioral changes and fewer incidents and collisions."

- Mark Vigliante, CEO
M&V Limo, Commack, NY

INCREASE FLEET SAFETY & PRODUCTIVITY WITH DUAL-VISION XC4 TOOLS

Improve the health of your fleet with the use of Rosco's Dual-Vision XC4 recorder, software, training, and driver/vehicle analytics tools.

REDUCE RISKY & DISTRACTED DRIVING BEHAVIORS THAT LEAD TO COLLISIONS

Reduce dangerous driving habits with better driver training and compliance. Real-time driver feedback from Dual-Vision in the cockpit of the vehicle will help "Prevent the Event" with automatic visual and audible alerts.

CREATE A CULTURE OF SAFETY & COMPLIANCE WITH DVXC4

Make safety a priority. DVXC4 allows fleet managers to implement a safety culture that supports corporate compliance requirements as well as federal safety laws.

BE ON THE ROAD WITH YOUR DRIVERS & TRACK VEHICLES IN REAL-TIME

DVXC4 gives real-time text and email notifications to fleet managers when an Event occurs, and with ROSCOLive access, also provides live tracking and streaming.

EARN LOWER INSURANCE PREMIUMS THROUGH REDUCED LOSSES & CLAIMS

Reduce costs and claims with a proven risk management system that provides valuable data & video of incidents and events. Exonerate drivers, and protect your company from false claims.

DUAL-VISION XC4

PN: DV440
Includes 64GB SD Card with DV-PRO® 5
Fleet Database Management Software

The DVXC4 is a windshield based dual camera system with continuous HD video and Event recording, with the options of adding two or more auxiliary cameras and enabling wireless file downloads and live track and trace.

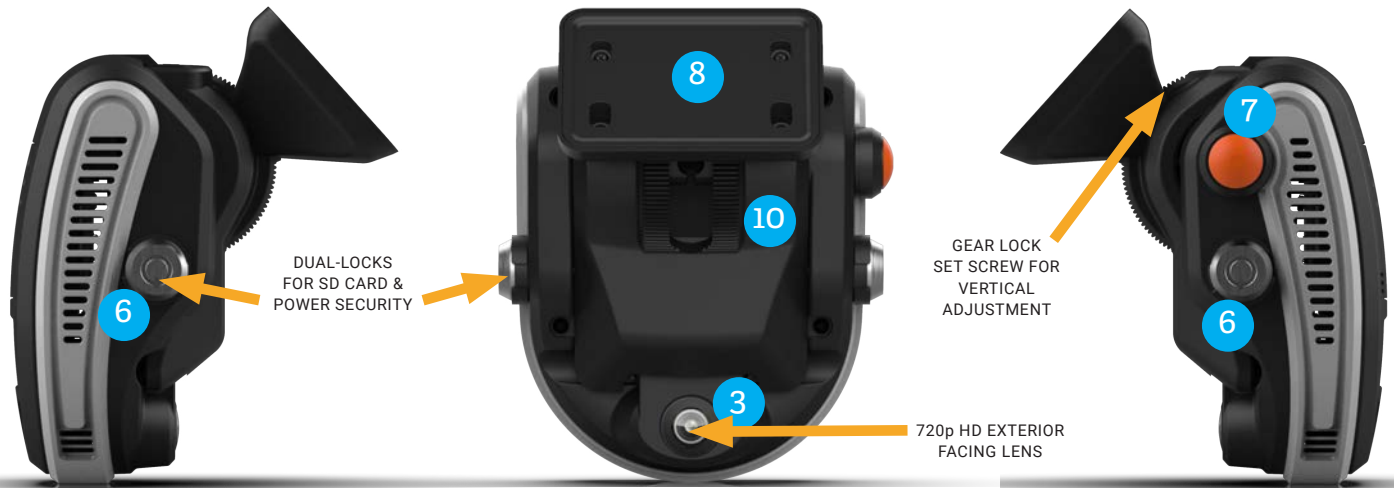

KEY FEATURES:

- + Continuous Video Recording
- + Event Recording
- + HD Video Quality
- + 720p Forward View Camera, 960H Interior Camera
- + Two Cameras Included as Standard in One Housing
- + Eight Additional Cameras¹ and Views Can Be Added
- + Tamper Proof SD Card Slot
- + 1,000+ Hours of Recording Time²
- + Night Vision for Interior View
- + Includes DV-Pro® 5 Software
- + Database Management
- + Custom Alert Notification
- + Wi-Fi Cloud Storage (WCS)³
- + Optional 4G LTE For Live Tracking and Video Streaming w/ Cloud Storage

1 Optional 960H Auxiliary Cameras For a Total of 10 Views
2 High-Capacity SD Card Needed
3 Wi-Fi Storage Available Through www.roscocloud.com

ROSCO'S DUAL-VISION® XC4 HAS THE **UNIQUE ABILITY** TO IDENTIFY UNSAFE DRIVING BEHAVIOR, RECORD HD VIDEO ON A CONTINUOUS AND EVENT BASIS, AND PROVIDE INSTANT DRIVER FEEDBACK WHEN AN EVENT OCCURS.

1	LCD Screen	6	Dual Locks for SD Card Security & Angle Lock
2	Interior Facing Camera	7	Driver Event Button
3	Exterior Facing Camera	8	Camera Mount w/ GPS
4	Infrared LEDs	9	Microphone
5	Speaker	10	Angle Adjustment

OPTIONAL ENHANCEMENTS

CONTINUOUS HD VIDEO

Continuously monitors and captures driving behavior using HD quality recording while simultaneously providing real-time driver feedback when an event occurs.

SD CARD

Fleet manager can remove secured SD card from recorder and view/save continuous video and/or events. Up to 512GB SD card and 1,000+ hours capacity.

AUDIBLE CHIME

Provides instant driver feedback when an event parameter is violated, keeping the driver aware and accountable for their behavior (can be turned off by fleet management).

ADDITIONAL CAMERAS

Allows for up to 8 additional camera views anywhere inside or outside of the vehicle for maximum vehicle coverage. A driver monitor is also available to display the extra camera views.

4G LTE CAPABILITY

Allows fleet managers to review and download video events while the vehicle is still on the road. Fleet managers can also access live streaming video.

WI-FI CAPABILITY

Fleet manager to have cloud based Wi-Fi upload of events and/or continuous video upon vehicle return to base.

DV-Pro[®] 5

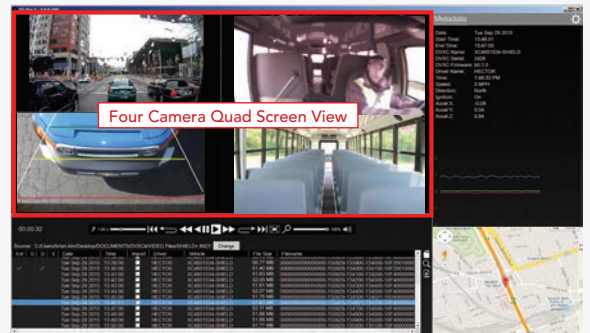

DV-PRO[®] 5 STANDARD DATA MANAGEMENT SOFTWARE

DV-Pro 5 software organizes information captured by the Dual-Vision XC4 recorder. DV-Pro 5 makes it fast and easy to view or transfer recorded data, locate specific events, archive or discard content, compile reports, and email files. This software allows management of information generated by the DVXC4 recorder and is included with each DVXC4 purchase. You can conduct searches based on detailed criteria and quickly make note of key events.

KEY FEATURES:

- Proprietary Video Files
- Playback Control
- Quad View
- Video Management
- GPS
- Accelerometer Display
- SD Card Formatting
- Recorder Configurations Settings
- Conversion to .avi Files
- Vehicle Routing

The Dual-Vision® XC4 can be enhanced with the addition of Wi-Fi Cloud Storage (WCS) or ROSCOLive® Cloud Services. Maximize your data's potential with the ability to wirelessly access data and downloads through our cloud platforms on www.roscocloud.com. For the ability to live stream video, be sure to choose ROSCOLive®.

BETTER
WIRELESS DATA DOWNLOADS

WI-FI CLOUD STORAGE (WCS)
WIRELESS DATA MANAGEMENT

WCS allows automatic downloads of video data files from the DVXC4 to a Rosco provided access point at the vehicle depot. This access point directs data to a cloud based user interface. The process is cost effective and simple, with the lowest monthly charges possible, and the video data is available moments after the vehicle returns to the depot. WCS is accessible through connected and mobile devices, instantaneously and without limitations.

KEY FEATURES:

- Access to www.roscocloud.com
- Wireless Data Downloads
- Video Cloud Storage
- Custom Video Requests via roscocloud.com
- Remote DVXC4 Firmware Updates
- Multi-User Accounts with Different Levels of Access & Roles

BEST
LIVE GPS, EVENTS, STREAMING

ROSCOLIVE®
REAL-TIME DATA MANAGEMENT

Dual-Vision XC4's cellular capabilities allow fleet managers to receive real-time Event notifications, and review and download live video while vehicles are still on the road. The Dual-Vision XC4 device connects to the ROSCOLive Cloud via a 4G cellular connection and users are able to pull videos and other data from RoscoLive Cloud. Live video streaming is also available for real-time footage of fleet vehicles.

KEY FEATURES:

- Live Track & Trace
- Remote Device & SD Card Management
- Real-Time Event Notifications
- Remote Video Downloads
- Live Video Streaming
- Vehicle Data Reporting

Note: Cellular plans and costs vary. Please consult with Rosco on the options that best fit your fleet. Cellular connectivity also allows for integration with certain telematics devices.

ROSCOLive[®]

Fleet Management

Easily manage your fleet wirelessly and in real-time with the newly updated, user friendly ROSCOLive interface. Be alerted in real-time when an Event occurs and have access to crucial snapshots and videos.

Remote Device Management

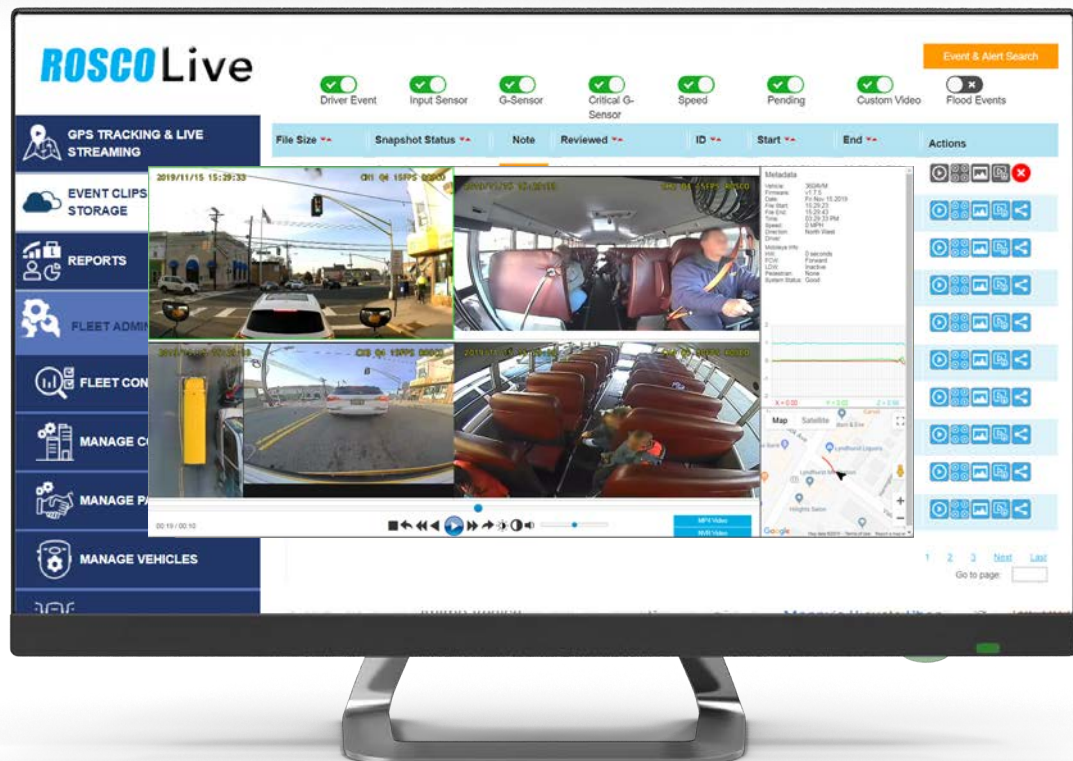

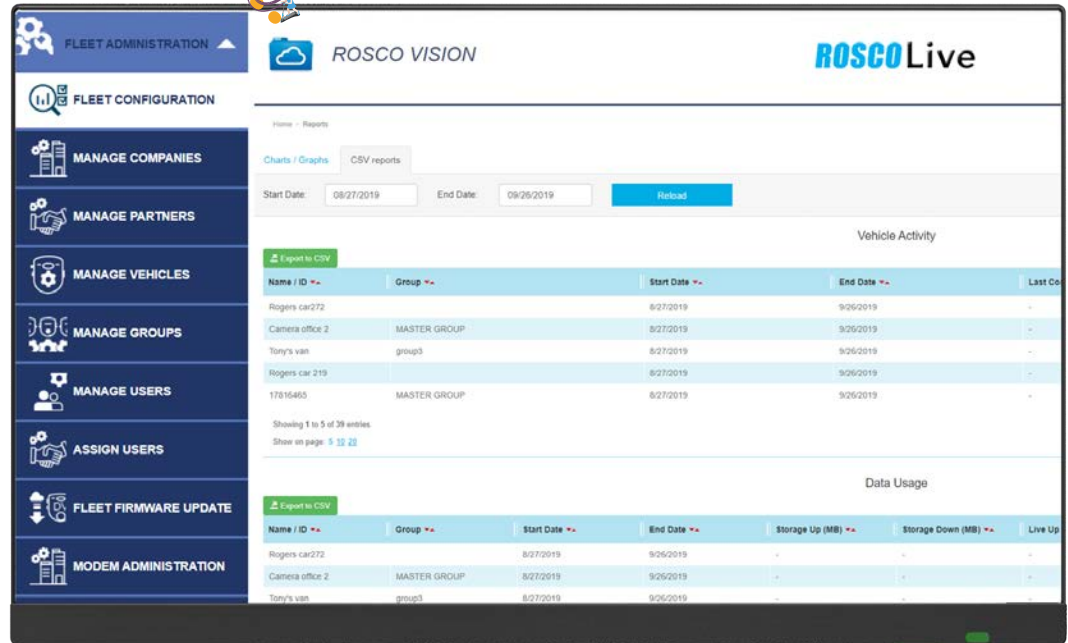

Wi-Fi & 4G LTE capabilities allow for easy management of the DVXC4 recorder. Firmware updates, accelerometer sensitivity, G-force settings, and other configurations can be done remotely and remote SD card formatting is available with ROSCOLive & a 4G LTE connection.

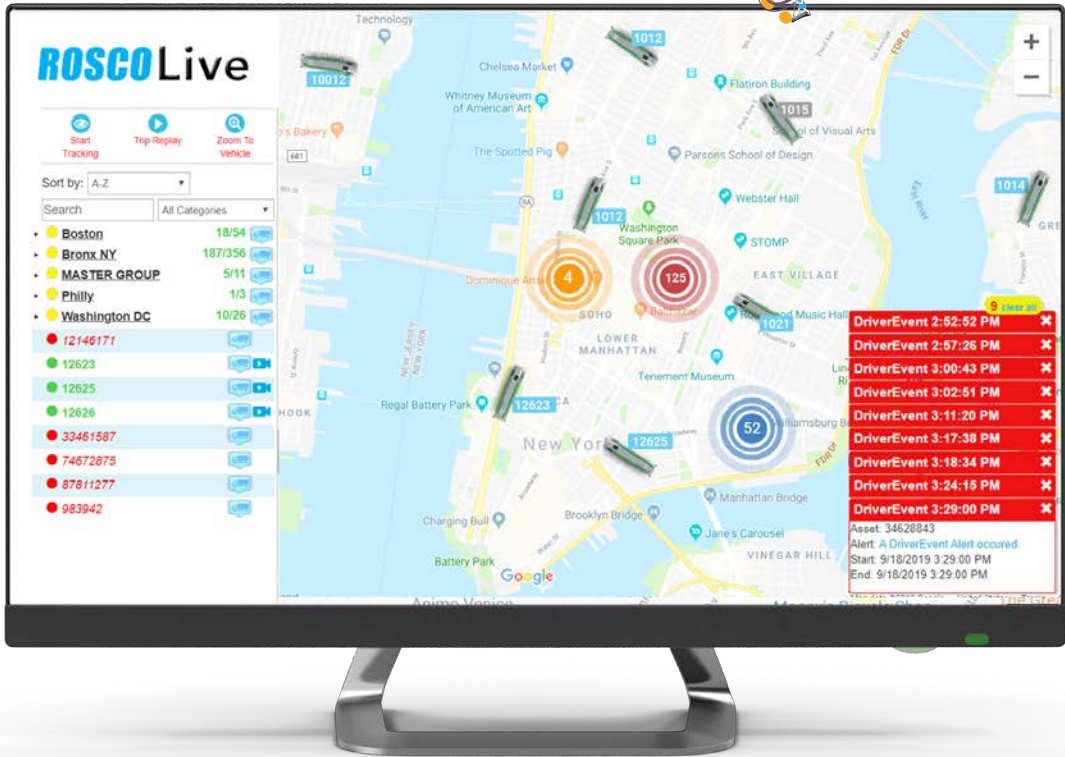

Video Cloud Storage

ROSCOLive Cloud Storage is available with the addition of WCS Wi-Fi or a 4G LTE plan for ROSCOLive. Give your data endless possibilities. Never worry about the loss of critical data due to SD card storage limitations.

Powerful Replay Tools

- PLAY VIDEO
- PLAY MULTI VIEW
- VIEW SNAPSHOT
- DOWNLOAD VIDEO
- SHARE EVENT

Live Tracking

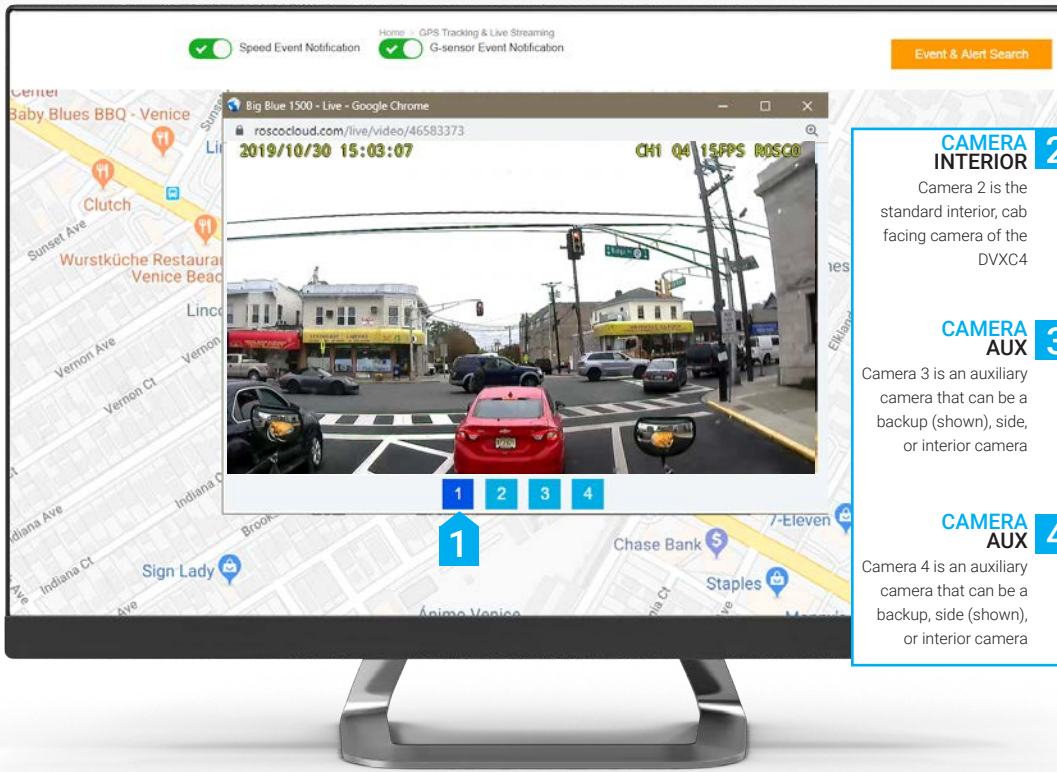

ROSCOLive offers fleet managers the ability to live track and trace all fleet vehicles equipped with DVXC4 & 4G LTE. Always know where your drivers & vehicles are with the addition of 4G LTE & ROSCOLive.

Telematics Integration

ROSCOLive can seamlessly integrate with third party telematics software to apply the power of video to your existing fleet management platform.

Live Video Streaming

Have the power to request and download real-time video with ROSCOLive. Receive live alerts on the ROSCOLive dashboard, from Events triggered by pre-determined limits set on the DVXC4 device.

ROSCOLIVE® & TELEMATICS INTEGRATION - DRIVER RANKING & REPORTING

ROSCOLive has the ability to seamlessly integrate with third party telematics and fleet management systems for an extra level of analytics and security. The DVXC4 and ROSCOLive combination connect with telematics devices in the cloud to provide video support for fleet performance evaluation tools. The ROSCOLive & telematics integration allows for driver performance reports, fleet evaluations, vehicle reports, and highest ranking incidents or Events.

OVER A CENTURY OF AUTOMOTIVE VISION SAFETY

NEW YORK SINCE 1907

For over a century, our goals have remained the same: We are committed to producing the highest quality automotive vision safety products and providing the exceptional level of service our customers have grown to expect.

Today, we supply our products to every major bus, and most truck and specialty vehicle manufacturers in North America. Our products are designed, built, and supported in the USA. Our staff has grown to over 300 people in facilities totaling over 150,000 square feet.

As we move forward we have set our goals even higher. We are now certified to ISO-9001:2015. Our focus on Total Quality Management and continuous improvement will keep our product value and quality at levels our customers deserve.

We will strive to improve our customer service through online and other electronic resources. We will continue to develop newer and better vision safety products to serve the ever-changing needs of the marketplace of tomorrow.
